Summary

Computer Science graduate with foundational knowledge in Business Analysis, Operations, Data Analytics, Excel, SQL, CRM Systems, KPI Reporting, and Process Improvement. Experienced in high-volume operations, operational analytics, workflow optimization, and data-driven decision-making through retail operations and analytics-focused projects.

Professional Experience

Operations Associate (Stock & Merchandising)

Walmart – Sault Ste. Marie, ON.

(Dec 2023 – Apr 2026)

- Managed and streamlined receiving and backroom operations, handling 2500+ units per shift with efficient unloading, sorting, and organization
- Reorganized backroom inventory flow and unloading processes, helping reduce stocking delays during high-volume shifts
- Coordinated merchandising and stock replenishment, ensuring strong product availability and adherence to company standards
- Maintained 95%+ inventory accuracy through stock tracking, reconciliation, and use of Excel and internal systems
- Demonstrated strong leadership by taking ownership of critical operations and earning management trust beyond core responsibilities
- Delivered proactive customer service, assisting customers and enhancing overall in-store experience

Customer Service Agent

IO Solutions – Charlottetown, PE.

(May 2023 – Aug 2023)

- Handled high-volume customer support calls for Rogers and Fido, achieving 85%+ resolution rate and Customer satisfaction.
- Reduced average call handling time by 25%+, improving operations efficiency and service throughput
- Maintained exceptional customer satisfaction through fast, accurate, and empathetic issue resolution
- Utilized CRM systems to track interactions, identify patterns, and support data-driven decision-making
- Collaborated cross-functionally to resolve escalations and improve service-level performance

Administrative Assistant

Beliyo Fashions – Mahabage, Sri Lanka

(Oct 2020 – Dec 2022)

- Supported business administration and daily operations, including inventory coordination and vendor communication
- Improved administrative workflows through structured process improvement and better task organization
- Assisted with reporting and basic data analysis to enhance operational visibility
- Delivered reliable customer service by managing client interactions and ensuring timely issue resolution

Volunteer Tutor

Sri Lanka

(Apr 2021 – Sep 2022)

- Mentored students through structured academic support, improving overall performance and consistency in key subjects
- Applied structured problem-solving and process improvement techniques to simplify complex concepts and enhance learning outcomes
- Strengthened leadership, communication, and coaching skills while managing multiple students and learning styles

Education and Training

Bachelor of Computer Science

Algoma University – Sault Ste. Marie, ON

(Jan 2023 – Apr 2026)

International Advanced Level – Business & IT

St. Joseph's College – Colombo, Sri Lanka

(May 2019 – Jun 2022)

Technical Skills & Project Experience

Data Analysis & Tools: Excel, SQL, Power BI, CRM, KPI Reporting, Dashboard Analytics, Data Visualization — Built a Retail Operations Analytics Dashboard focused on sales, inventory, and operational performance.

(Live Demo: <https://chelakafernando102.github.io/retail-operations-intelligence-dashboard/>)

Web & Interactive Development: HTML, CSS, JavaScript, Three.js, Blender — Built responsive web applications and multiple 3D interactive environments using Three.js, enabling real-time rendering and user interaction.

(Live Demo: <https://codepen.io/Chelaka-Fernando/pen/qEEjLzG>)

AI & Programming: Python, Java, C++, Google Gemini API — Developed applications, including an AI chatbot for Algoma University, focusing on logic and optimization.

(Live Demo: <https://ai-chatbot-for-algoma-university.onrender.com>)
